4.2 Bats (Bat Testing is in Effect)

- A. All bats approved by USSSA, NSA, ASA, & ISA are legal for league play at Mills Pond.
- B. Bat should be marked with a Bat Performance Factor (BPF) of 1.20 or less if it is a USSSA bat.
- C. No altered, titanium, or senior bats will be allowed.
- D. Any bat not identifiable by the markings on the bat as an approved bat or with any visible cracks, shall be considered illegal.
- E. Any bat barrel with a foreign substance such as spray glue, stick'em, pine tar, or any other substance that may help the bat grip the ball will be removed from the game at the umpire's discretion.

- F. If the bat is clearly illegal (no testing needed), the player using the illegal bat and the owner of the bat will be ejected from the game. An out is called and all action is nullified.
- G. If the bat is in question and is not clearly illegal, the umpire, umpire in chief, director, or city staff, has the right to request the inspection of the bat that is brought into the softball complex. The player will have two options:
1. Admit that the bat has been altered:
 - The player will be ejected from the game, an out is called, and all action is nullified. The game will be scored as a forfeit against the team whose player or players used the illegal bat. No suspensions will be issued.
 2. Allow City Personnel / League Director to test the bat:
 - During testing, the game will proceed normally.
 - If the bat passes compression testing, the bat will be returned immediately.
 - If the bat fails compression testing, the game will be scored as a forfeit against the team whose player or players used the illegal bat. The player using the bat and the owner of the bat will be immediately suspended from all league play at Mills Pond Park for 1-year.
 - Any refusal to allow us to test a bat will result in an immediate 1-year suspension for the player using the bat and the owner for the bat.
 - Suspensions shall be binding on the person using the bat as well as the owner of the bat.
 - Suspensions may not be appealed.
- H. A non-linear bat is a bat whose structure deviates from the traditional single wall, multi wall and/or layered composite designs. The bats' performance will consistently and repeatedly produce BCT results softer than the existing threshold and have not produced a BBS over 98. A list of these bats can be found at the link below: <http://www.teamusa.org/USA-Softball/Play-ASA/Certified-ASA-Equipment/Non-Linear-Bat-Compression-Thresholds>
