## TRANSPORTATION AND TRAFFIC UPDATE

Tracking Progress on Fort Lauderdale Commission Priorities for 2021

May 2021

### CITYWIDE NEIGHBORHOOD ENHANCEMENTS

The Transportation and Mobility Department is responsible for a variety of projects throughout the City ranging from complex plans that require interagency coordination to small-scale neighborhood improvements. As neighbors are spending more time at home, the Department has experienced an influx of requests for projects such as traffic signal box wraps, speed radar signs, pavement markings, and speed humps that lead to enhanced safety and neighborhood appeal.

The following is a brief overview of the status of these neighborhood projects. To learn more about the work of the Transportation and Mobility Department and to apply for improvements in your neighborhood, visit [ftlcity.info/TAMppi](http://ftlcity.info/TAMppi).

#### Traffic Signal Box Wraps

Between 2020-2022, 46 traffic signal boxes will be wrapped throughout Fort Lauderdale to promote beautification and neighborhood engagement. Several locations that have been recently wrapped include NE 13 Street between NW 7 Avenue and US 1 in Middle River Terrace, Poinsettia Heights, and Lake Ridge; NW 15 Avenue between Sunrise Boulevard and NW 19 Street in Lauderdale Manors; and NE 26 Street between Bayview Drive and US 1 in Coral Ridge.

#### Speed Radar Signs

Transportation and Mobility staff has installed speed radar signs in several locations throughout the City to assist with traffic calming efforts. These signs have recently been installed in Rio Vista and Las Olas Isles. By the end of this summer, new signs will be installed in Poinsettia Heights, Victoria Park, and Durrs.

## Pavement Markings

The pavement marking program is a coordinated effort between Transportation and Mobility, the Public Works Road Services Team, and Broward County's Traffic Engineering Division. Over the past three months, Transportation and Mobility staff has completed site reviews and identified over 75 locations that are scheduled to be revitalized. These photos show recently completed enhancements in Tarpon River.

Before - SW 8 Avenue

After - SW 8 Avenue

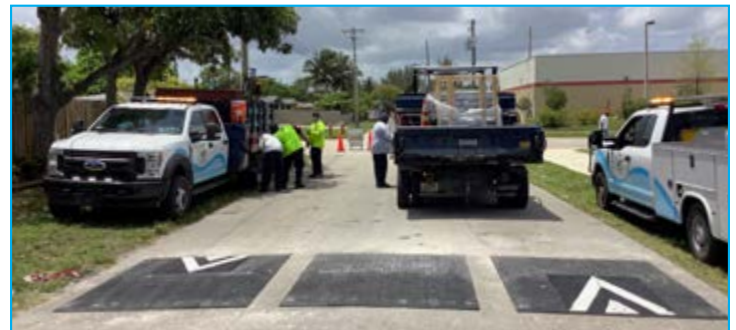

Before - SW 11 Court

After - SW 11 Court

## Speed Humps

Transportation and Mobility was granted additional funding this fiscal year to install speed humps throughout each of the City's four districts. The City has moved away from concrete and asphalt speed humps and is instead installing pre-fabricated speed cushions that feature high-visibility pavement markings and can be installed with minimal disruption to the surrounding area. The City installed over 50 speed cushions in the last year and is scheduled to install another 25 by the end of this year.
