Re: City Webpage for Large Projects and Partnerships

In an effort to keep our neighbors informed of current and upcoming major projects and Public-Private Partnerships (P3s), City staff has created a website which includes detailed information on these projects.

The site can be found at: fortlauderdale.gov/majorprojects. The purpose of the site is to provide ample awareness of the City's work on behalf of our neighbors, including the timeline, scope and costs associated with each.

The ultimate goal will be to create a space for community engagement. Additional features will be added in the future to encourage ongoing discourse from neighbors for their feedback and input.
