

Benefits designed to help protect eye health at every life stage

Eye or vision changes may be more frequent for those who are pregnant or breastfeeding—and for growing kids, too. So it's good to know your UnitedHealthcare Vision plan includes expanded benefits designed to support optimal eye health when it may be needed most.

These expanded vision benefits for those who are pregnant or breastfeeding—as well as covered children up to age 13—are included at no additional premium cost:

- **Coverage for a second eye exam**
If you notice changes to your vision during the plan year, you can get your eyes checked a second time without paying an additional premium; standard copays apply.
- **Coverage for 1 new pair of glasses (frames and lenses)**
If your prescription changes .5 diopter* or more in a plan year, you can get new glasses without paying an additional premium; standard copays apply.
